

Sail feeder

Aluminium for LS/LX models
Body in Stainless steel for
R models (except R34)

velcro attachment +
integrat holding pin

DRUM & SWIVEL

Bearing box

(Steel bearings running in grease)

Linear rotation

This bearing box takes the axial loads (halyard tension) and lateral loads (outhaul tension)

Anodization

(30 microns) protects parts against impacts and abrasion

Halyard deflector wheel

(see page 22)

High load Swivel

(waterproof)

Strong sections and connections

Torx® screws for an easy fitting and further dismantling (see p.24)

Bottom telescopic section

enables to adjust foil section length, no cutting (see p. 24)

Internal turnbuckle fitting

provides space inside for the turnbuckle (see page10)

Rotating tack fitting (LX & RX)

Fitted with Torlon® balls : this system takes up automatically the sail fullness when furling.

Synthetic insulation

to prevent electrolysis

360°adjustable furling line

For an optimal running of the furling line
