

FACSLIDE⁺

Top and bottom stoppers (EB15, ER40)

Delivered in the FACSLIDE[®] kit, these stoppers prevent the cars from sliding out of the tracks.

Headboard cars (FT10, FT20, FT30, FT40)

can be fitted on the head board of the existing sail or simply on a ring

Gafflock option

Mainsail autolocking 2T5 and 4T (see p.55)

+ than 180°

toggle with large articulation

Safety-clip device (similar to the FX Gennaker furlers)

Monoblock cars

The FACSLIDE[®] cars are CNC machined in one block of aluminium, this makes them shock-proof when lowering the sail.

Automatic reefing

- Reefing the mainsail is easy as the effort for tightening the halyard are limited.
- As a complementary boom option Facnor supplies the F40 outhaul foot car. (ref. 540 204 008 20)

Tracks fitting to the mast without modification

The tracks are easily fixed with slugs alongside the existing mast without unstepping (see page 54).
